Summary

Full-stack developer and co-founder of Collan (collan.dev). 3+ years building production web applications for clients and startups: React and TypeScript on the frontend, Python and Django on the backend. Shipped e-commerce, fintech, and streaming products, including client sites live in production across Nigeria. Open to full-time remote opportunities.

Experience

Co-Founder & Full-Stack Developer · Collan

Remote · November 2025 – Present · collan.dev

- Co-founded a social networking platform for techies with a community feed, project marketplace, live sessions, and real-time chat. Launched V1 in March 2026, crossed 1,000 users in the first two months, and is approaching 2,000; V2 and a mobile app are in development.

Full-Stack Developer (Freelance) · Self-Employed

Remote · January 2023 – Present

- Built and shipped [Fredan Textiles](#): a React + TypeScript storefront with a Django REST backend (products, orders, gallery, newsletter) that the owner runs entirely through the Django admin, live on a custom domain.
- Delivered production client sites including [Kings Tech Solutions](#) (smart energy and security company operating across 12+ states) and [Apex TechHub](#) (EdTech platform with integrated payments).
- Delivered a complete Squarespace site for [Crestforge Construction](#) in one weekend: hired on Friday with no prior platform experience, live by Sunday.

Frontend Developer Intern · Ibs Golden

Ikeja, Lagos · January 2025 – December 2025

- Built frontend interfaces with a development team using modern React and component-driven architecture.
